

মডিউল এসাইনমেন্ট

(Module 4) Exam Week Assignment

Assignment:

Create a simple Library Management System Console App.

Requirements:

1. Create a base class called "LibraryItem" with the following:
 - Properties: "Title" (string), "ItemId" (int), "IsAvailable" (bool)
 - A constructor to initialize these properties
 - A virtual method "DisplayInfo()" that prints the item details
2. Create two derived classes:
 - "Book" class that inherits from "LibraryItem"
 - Additional property: "Author" (string)
 - Override the "DisplayInfo()" method to include author information
 - "Magazine" class that inherits from "LibraryItem"
 - Additional property: "IssueNumber" (int)
 - Override the "DisplayInfo()" method to include issue number
3. In the "Main" method:
 - Create 2 Book objects and 1 Magazine object
 - Display information for all items
 - Demonstrate borrowing an item (set "IsAvailable" to false)
